.....

WASHINGTON - Reagan administration officials say the dis-patch of two U.S. AWACS surveil-lance planes and an escort of F-15 fighters to help Chad is aimed at countering what Washington per-ceives to be an effort by Libya to create its own sphere of influence

In geopolitical terms, officials say that Chad, which is an impov-erished, landlocked desert nation with a population of 4.4 million people, is relatively unimportant to U.S. security interests.

But the officials said that as a testing ground, and potential base. for Libyan attempts to subvert other nations, including Egypt, Sudan and Nigeria, Chad had become the focus of a Western effort to demonstrate to Colonel Moamer Qadhafi, the Libyan leader, that attempts to expand his influence would be strenuously opposed.

A senior administration official said Sunday, one day after the planes were sent, "We view Libyan aggression in Chad as only the latest and most brazen example of a broader pattern of Libyan efforts to destabilize and subvert governments across a whole belt of states

Although Libya has bought large quantities of arms from the Soviet Union and has been viewed at times by U.S. officials as an erratic Soviet ally, administration officials say they do not believe Libyan activities in Africa are coordinated

Administration officials said about 2,000 Libyan troops had moved into northern Chad to supAn official who insisted on ano- Sudan along with support aircraft.

By William Claiborne

COLOMBO, Sri Lanka — Marxist officers in Sri Lanka's army encouraged the ethnic con-flict that led to the island republic's worst communal violence since independence, and then participated in it in an attempt to stage a coup d'etat, President Junius R. Jayewardene has charged.

Mr. Javewardene, interviewed at his home last week, said he received "typewritten evidence" last Tuesday, which he planned to release soon, showing that army officers loyal to the Marxist-Leninist People's Liberation Front planned civil disturbances in five stages designed to lead to an overthrow of his government by the military and national police. He said the evidence came from party informers. He said he had no "direct evi-

dence" that a foreign power was involved in the coup attempt and added: "It's a very serious thing to point a finger. If we do get direct evidence, we certainly will do so." Mr. Jayewardene said three

Marxist-oriented political parties, in collaboration with the leftist military officers, successfully exploited centuries of tension and distrust between the Buddhist Sinhalese, who form 73 percent of the country's 15 million population, and the Hindu Tamils, who make up 20 percent, to cause violence as a cov-er for a takeover of his government.

He said the plotters used the ambush to launch the first phase of a revolution by fanning the hatred between the Sinhalese and the

The president said the second and third stages of the revolution, which did not succeed, were designed to incite violence between Sinhalese and the small Moslem minority and between Buddhists and Christians. "If they had succeeded, there would have been a fairly general conflagration." Mr.

food, the plotters then intended to incite food riots to add to the confusion, Mr. Jayewardene said. The last stage was to be a takeover of the government by "dissidents" in the army and national police.

People's Liberation Front, which in 1971 attempted to oust the governits kind since Sri Lanka, known as ment of Sirimavo Bandaranaiko and whose leaders were released from prison by Mr. Jayewardene in bers of the pro-Moscow Sri Lanka Communist Party and a small Trotskyite party, the New Equal Society Party, Mr. Jayewardene banned all these parties last week. He said Communist members of Mr. Bandaranaike's Sri Lanka Freedom Party, which has not been

Craxi's Economic Pill May Be Bitter for Left

By Henry Tanner

Oscar Mejias Victores

onal Herald Tribune ROME - As Bettino Craxi prepares to go before Parliament Tuesday evening to introduce his gov-erument and its policy program, it has become increasingly clear that Italy's first Socialist prime minister is committed to domestic and forcign policies that will dismay much of the Italian Left.

on which it has to act immediately, the Craxi government is reported to be preparing stronger measures It is set to give priority to strong but "socially fair" anti-inflation

Mr. Craxi, it is understood.

A pro-American Atlanticist and

résults.

Kohl of West Germany, he is call-He has expressed interest in the "walk-in-the-woods" outline proposed by the American negotiator. Paul H. Nitze, and his Soviet counterpart, Yuli A. Kvitsinsky. The outline, which was rejected by both Moscow and Washington, called for a reduction in Soviet SS-20 missiles aimed at Europe to about 75 and limitation of the new U.S. deployment to the same number of cruise missiles. An agreement along such lines would take much of the political pressure off the European

vernments involved. alition parties. According to Giu-

liano Amato, the expert who conducted the negotiations for Mr. Craxi, the other parties had underestimated the Socialists' realism.

His party has changed since the boom years of the 1960s, when it was the role of a Socialist Party to press for constant economic expansion to create jobs and increase salaries and social services, he said in an interview.

"We are a party which knows that protecting salaries without taking care of inflation" is unrealis-tic and that it is impossible to protect jobs in industries that are dying, Mr. Amato said. In the economic crisis of the

1980s, leftist parties themselves must be willing to take the necessary economic steps because otherwise the voters will turn to conservative regimes as in Britain, the United States and West Germany, which will adopt the needed measures "without regard to social fairness." he said. Mr. Amato was appointed un-

dersecretary in the prime minister's office last Friday, confirming his role as Mr. Craxi's closest adviser. (Continued on Page 2, Col. 4)

By Ward Sinclair

Washington Past Service WASHINGTON - From the Rocky Mountains to the Atlantic, heat and dry weather are seriously threatening the corn and soybean crops that underpin the

U.S. farm economy.

The unexpected drought comes on top of the Reagan administration's payment-in-kind program, which had already reduced expected production of grain and other major crops. The result could be sharply increased food prices next year on everything from beef

and pork to eggs, soft drinks and cooking oil. Specialists at the Department of Agriculture see the next two weeks as critical in shaping the 1983 corn and soybean crops.

"It is a discouraging picture," said Lyle Denny, a U.S. meteorologist. He said that forecasts for August all predict less rain and warmer weather than normal. in Des Moines, iowa, Orville Sweet, executive vicepresident of the National Pork Producers Council, showed a bit more optimism. "We're just one good rain away from prosperity," he said.

A former Democratic official in the Department of Agriculture put it in political terms: "If this corn crop goes down the tubes, you'll hear people calling this of drought in the key Corn Belt states. Some private

was, in part, an effort to press France to do more. The State Department said Saturday that the two AWACS planes. F-15 fighter escorts, aerial tankers and other reconnaissance planes had been sent to monitor reported Libyan air attacks on government-held positions in Chad.

There has been no official word about where the planes were to be based, but some officials suggested they were flown from U.S. bases and were to be stationed in Sudan. which borders Chad on the east. A State Department spokesman stressed that "we do not anticipate that these aircraft would operate in a situation where they will come under attack."

Administration officials said that at current force levels, the em-battled government of Mr. Habré faces no immediate threat of being overthrown by the rebels, who are led by his predecessor as president, Goukouni Oueddei. But the U.S. officials said that any increase in Libyan support could quickly change the outlook and push the fighting toward Ndjamena, the

capital. Earlier this year President Reagan sent four AWACS planes to Egypt as a show of force after learning that U.S. and Egyptian intelligence agencies had discovered a Libyan plan to overthrow the Sudanese government. The reported plan was denied by Mr. Qadhafi.

American officials said Mr. Qadhafi persuaded Ethiopia and Southern Yemen to sign a friend-ship treaty with Libya in 1981.

Somalia, which has received U.S. support since it expelled Soviet and Cuban advisers in 1977, viewed the treaty as a threat to its security.

Although the officials lack hard evidence of Libyan involvement in a coup that toppled the leaders of Upper Volta last week, they said the new government, headed by Captain Thomas Sankara, a paratroop commander, was likely to be

sympathetic to Libyan interests.

If Chad falls under Libyan control, the officials fear surrounding countries, most of which are impoverished and militarily weak, would be easy prey for Mr. Qadha-fi. These include Niger, Cameroon, the Central African Republic and

In addition, the officials fear that two strategically vital countries, Nigeria and Egypt, could ultimate-ly be threatened by Libya.

Libya Is Said To Join Siege

(Continued from Page 1) sources said there had been several

meetings and telephone contacts between the two sides. France is providing an undismunition to Mr. Habre's troops.

■ French Change Reported The Washington Post quoted U.S. officials as saying Monday that the French government had "considerably modified" its deci-

sion not to intervene militarily in

Coup Staged in Guatemala the fighting in Chad. The officials, who declined to be identified, said that the French were waiting to see if Libyan bombing raids continued in Chad

Defense Minister Charles Hernu vas quoted Sunday as saying, France will supply Chad's government with assistance adapted to the situation in the framework of the 1976 accord," which provides only for logistic support.

Mr. Hernu's remarks, said Mr. Hughes, the State Department spokesman, "were taken out of context" by the media. "Our under-standing is that the French will reach the necessary decisions in the light of the situation in Chad."

WORLD BRIEFS

U.S. Senator to Meet Polish Officials

WARSAW (AP) - Senator Christopher J. Dodd arrived in Poland on Monday for a three-day visit during which he is expected to have discussions with Polish officials over the possible lifting of Western economic sanctions.

Mr. Dodd, a Connecticut Democrat and a member of the Foreign, Affairs and Finance committees, is thought to favor lifting the sanctions, His visit is designed in part to generate U.S. sentiment for relaxing the tough U.S. stance toward Poland. Western diplomats in Warsaw said. The United States and its allies said they might ease the sanctions after

martial law ended July 22.

Mr. Dodd was scheduled to meet Tuesday with Zbigniew Gertych, vice marshal of the Polish parliament; Finance Minister Tadeusz Nieckarz; and the Roman Catholic primate, Jozef Glemp. He is also expected to travel to Gdansk to meet with Lech Walesa, chairman of the outlawed Solidarity labor federation.

Security Set for French Basque Area

PAU, France (Reuters) - The French government will adopt special security measures in the French Basque region to curb an upsurge of violence by separatists, local officials said Monday. They said details

would be announced in the next few days.

A policemen was shot to death and another was seriously injured Sunday in Dax, in southwest France, in the bloodiest incident this year in the region. Police said they suspected that militants of the separatist group Iparretarak (Those of the North) carried out the attack, which local group Iparretarak (Those of the North) carried out the attack, which local group Iparretarak (Those of the North) carried out the attack, which local group Iparretarak (Those of the North) carried out the attack, which local group Iparretarak (Those of the North) carried out the attack, which local group Iparretarak (Those of the North) carried out the attack, which local group Iparretarak (Those of the North) carried out the attack, which local group Iparretarak (Those of the North) carried out the attack, which local group Iparretarak (Those of the North) carried out the attack, which local group Iparretarak (Those of the North) carried out the attack which local group Iparretarak (Those of the North) carried out the attack which local group Iparretarak (Those of the North) carried out the attack which local group Iparretarak (Those of the North) carried out the attack which local group Iparretarak (Those of the North) carried out the attack which local group Iparretarak (Those of the North) carried out the attack group Iparretarak (Those of the North) carried out the attack group Iparretarak (Those of the North) carried out the attack group Iparretarak (Those of the North) carried out the attack group Iparretarak (Those of the North) carried out the attack group Iparretarak (Those of the North) carried out the attack group Iparretarak (Those of the North) carried out the attack group Iparretarak (Those of the North) carried out the attack group Iparretarak (Those of the North) carried out the attack group Iparretarak (Those of the North) carried out the attack group Iparretarak (Those of the North) carried out the attack group Iparretarak (Those of the North) carried out the attack grou officials said they saw as a sign of deterioration of the political climate in

Police said they thought the attack was related to the arrest last week of two Basque activists in connection with a fire-bombing at a vacation villa near the Spanish border. The French Basque region has not experienced recurrent violence until recently. Officials said it was not clear whether Iparretarak had links with the Spanish Basque separatist group ETA.

300 Arrests Reported in Indian State

NEW DELHI (Reuters) — More than 300 members of opposition parties and trade unions have been arrested in the eastern Indian state of Orissa, where a general strike is planned for Tuesday, the Press Trust of India reported Monday.

The news agency said the strike was called by the opposition Bharatiya Janata party, the Janata party and the Communist Party to protest what the opposition called rampant corruption and failure of the state govern-

UN Leader Offers Cyprus Peace Plan NICOSIA (UPI) - United Nations Secretary-General Javier Pérez de Ciréllar has proposed a plan for settling the Cyprus problem, a government spokesman said Monday. He said Mr. Perez de Cuellar's special representative in Cyprus, Hugo Gobbi, delivered the proposals Monday to Foreign Minister Nicos A. Rolandis.

The document contained "a number of points in the form of ar \... unofficial sounding with the aim of giving substance to the initiative the secretary-general has undertaken to promote a just and lasting solution to the Cyprus problem," the spokesman said, but declined to elaborate. Turkey moved an occupation force into northern Cyprus in 1974 after six years of unsuccessful talks between Greek and Turkish Cypriots.

The spokesman said President Spyros Kyprianou cut short his holiday in the Greek islands and went to Athens late Monday to meet Prime Minister Andreas Papandreou and later planned to fly back to Cyprus for consultation with advisers and party leaders.

Arafat Sees Progress on Prisoner Swap

VIENNA (AP) - The PLO leader, Yasser Arafat, said in an interview broadcast Monday that there will be progress soon in efforts to swap six Israeli prisoners for most of the 5,000 Palestine Liberation Organization fighters captured by the Israelis in the war in Lebanon last year.

Negotiations on the exchange have been going on for months with the help of the former Austrian chancellor, Bruno Kreisky. In an interview with Austrian television broadcast Monday, Mr. Arafat said he had advised the Austrian government of his readiness to conduct "final negotiations" with the Israelis through the International Committee of

The tense situation in Lebanon, the rift in Mr. Arafat's el-Fatah guerilla group and his expulsion from Damascus on June 26 appear to have delayed progress in the bargaining.

For the Record

OFFUTT AIR FORCE BASE, Nebraska (Combined Dispatches) — Protesters doused themselves with blood and 208 persons were arrested at a demonstration Sunday at Strategic Air Command headquarters, one of dozens of rallies nationwide marking the 38th anniversary of the bombing of Hiroshima. In Nagasaki, Japan, thousands of anti-nuclear activists opened a two-day conference Monday calling for a ban on nuclear weapons. Nagasaki was also decimated by an atomic bomb in 1945.

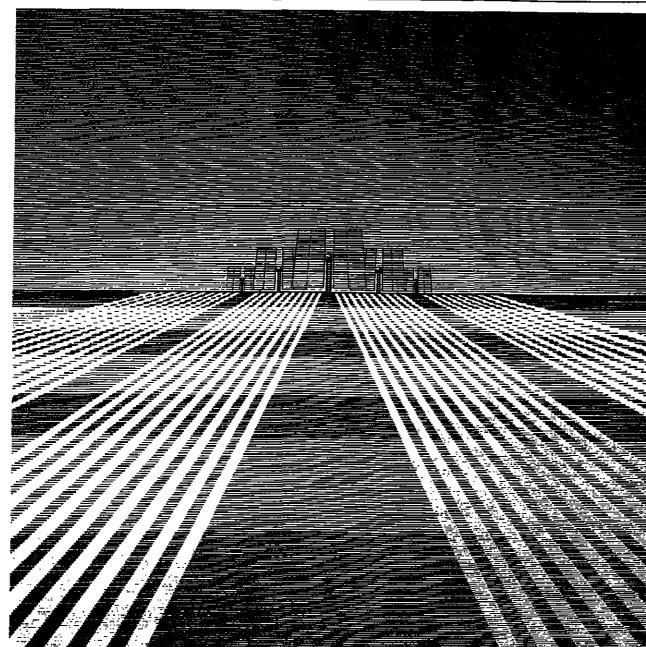

BELFAST (AP) — Police officers fired plastic bullets to disperse Roman Catholic rioters attacking security force patrols early Monday in northern Belfast, the police said.

LONDON (AP) — Two shots were fired by a passing motorist Sunday at a "peace camp" of women protestors outside the U.S. cruise missile base at Greenham Common, but no one was hurt, the police reported. The front, in a letter to the Italian news agency ANSA, called on Pope John Paul II to declare: "Ali took responsibility Monday for a bombing early Sunday that damaged a Agea is a human being like Eman-

as one." The letter did not say explicitly that the group was dropping its earlier demand that Mr. Agea be released.

O.S. Air Force officers club at frank Air Base near here, the public prosecutor's office said.

COMISO, Sicily (AP) — Police using tear gas and riot sticks clashed Monday with more than 1,000 rock-throwing protesters outside a planned cruise missile base. Fifty-six persons were injured, officials said, and 20 protesters were taken into custody.

and detailed for the first time in the House candidates, not just in that Breglio-Bryant computer analysis, region but throughout the country. adds to concerns that many Republicans have expressed about the potential for significant increases in black voter registration in that region. Women have persistently given Mr. Reagan lower approval ratings than men, and the presi-dent's support from blacks is mini-

"You put the two together," Mrs. Bryant said, "and we have a serious problem."

at least to some degree, at the White House, Edward J. Rollins. Mr. Reagan's top political assistant, was reported to have told Reticularly strongly since 1976. The states are North Carolina, Georgia, Kentucky, Alabama and Tennesmer that the South would probably mer that the South would probably be severely split in 1984, rather than giving virtually all its electoral votes to Mr. Reagan as it did in

But Mr. Breglio and Mrs. Bryant the long a tants have found. Of these nime also contend that the trend toward increasing turnouts of blacks and

The growing impact of the wom-en's vote in the South, measured races more difficult for the party's races more difficult for the party's

> There are key Senate races, in-volving Republican-held seats, in North Carolina, Tennessee, Virginis and Texas, all of which appear high on the Breglio-Bryant list of affected states. Mississippi, which was not analyzed because of its small population, also has a vital Senate race and probably fits the

same pattern, they said.

Outside of the South, Illinois, Iowa and Minnesota are other states where the growing impact of the women's vote could have serious consequences for the Republi-

Mr. Breglio and Mrs. Bryant, who in 1982 headed the staff of the Republican Senatorial Campaign Committee, said the "gender gap' was of equal concern to GOP can didates in general as well as the president. Mrs. Bryant said that "of 15 seriously contested Senate races in 1982, only two of the Republican candidates ran as well among women as they did among men.'

Those candidates were Senators Robert T. Stafford of Vermont and John C. Danforth of Missouri, and a late slump in support from women almost caused a Danforth defeat by a woman opponent, they said.

While the general phenomenon of increasing participation by women in the electorate had been identified by the Census Bureau and news organization polls, the Breglio-Bryant study is the first to spell out its electoral consequences by tracing the pattern to individual

Using unpublished data from the Census Bureau's biennial survey of voting participation, Mr. Breglio and Mrs. Bryant reported that:

 In all of the 25 most populous states, women cast more votes than men did in 1980; in 1982 the pattern was the same except in Louisiana, where men cast more votes than did women.

● In 15 of the 25 states, women in 1980 than in 1976, and in 17 of the 25 states, women had greater impact in 1982 than in 1978.

"There is every reason to think," Mr. Breglio said, "that this trend will continue in 1984."

The estimated impact in specific states is dramatic. In Florida, for example, where the presidential vote total increased by more than 400,000 between 1976 and 1980, the calculation is that 129,000 more males but 303,000 more women went to the polls. In Georgia, where the vote total jumped by more than half a million between 1978 and 1982, the Breglio-Bryant estimate is that 217,000 of the additional voters were men and 322,000 were WOMEN

Pentagon lawyers doubt that they could legally conscript essential civilians even in wartime, an action that would bring civilians under miltiary justice.

Despite this impediment, Pentagon officials realize that they cannot afford to give up on the search for a solution because the problem is growing more urgent as the civilian labor force in the military increases in size.

Its growth has been spurred by the increasing number of complex weapons systems on which the military depends but which it cannot easily operate or maintain. On one modern aircraft carrier, for instance, a group of admirals recently was agog at the wonders a civilian technician could perform with the ship's combat information computboard could produce.

Adding to the problem is the fact that the military cannot keep the with recent pay increases, these uniformed technicians can get higher pay from private companies which raid the military for technicians. Often, these ex-soldiers end up at their old jobs, but with higher pay and without having to salute

In polling civilian workers to find out what would persuade them to stay at their posts, defense officials found three main concerns:

 That in a crisis the civilians families be evacuated along with other military families, not after

● That civilian employees be given protection against being shot as by the enemy,

• That they be given extra pay

Indeed, thousands of civilians civilians recommended that along with picking up the tab for hazardtroops in Vietnam without any ous duty pay and combat bonuses, the Pentagon should pay for the And while there is no reason to civilians' insurance premiums for

In return, the executives sug professional than their predeces-sors, no one in the Pentagon can be military would be "expected" to risks and promising to stay on the

Poll Shows Reagan Gaining Support On Economy, Losing on Diplomacy

By Barry Sussman Washington Post Service

WASHINGTON - President Ronald Reagan continues to make sharp gains in persuading the pub-lic that he has turned the nation's economy around, but concern is mounting over his conduct of foreign policy, according to a Washington Post-ABC News national

The contrast in public perceptions of these major aspects of the Reagan presidency is stunning. By and large, the president's ratings on the economy are the highest, or nearly the highest, since he took office. But with growing concern over possible entanglement in Central America and an apparent stalemate in the Middle East, Mr. Reagan is drawing lower ratings than ever in foreign affairs.

The result appears to be a stalemate of another kind. With the economy boosting his appeal but foreign policy working against him, Mr. Reagan shows no improvement in his overall approval rating. though he has picked up slightly in trial heats against the two leading Democratic contenders for the presidency in 1984.

The economic news in the poll is almost all favorable for the presi-• Half of those interviewed feel

the nation's economy is improving the sharpest expression of confidence on that point since Mr. Reaean took office.

By 52 percent to 46 percent respondents said they approve of Mr. Reagan's handling of the economy, the best rating he has had since October 1981 in a Post-ABC News poll.

• By 54 percent to 44 percent, the public grades Mr. Reagan positively for his handling of inflation, his highest rating since the Post-ABC News poll began asking that

along with the growth in optimism ity rating has shown no improvement over recent polls. Today, 52

about the same. The new poll strongly suggests that concern over the direction of foreign affairs is having a dampening effect on Mr. Reagan's popularity. Overall, 42 percent of those interviewed rate him favorably for his handling of foreign affairs and 49 percent unfavorably, his worst

Whose Job in Chad?

Suddenly the Reagan administration is deep into the crisis in Chad, where insurgents backed by Libya, a radical Soviet client state, are pressing the government hard. Three U.S. military advisers are on the ground, the fleet is being shown off Libya's Mediterranean coast. AWACS surveillance planes are on the scene and some millions of dollars are on the way in various forms of military aid. It adds up to a conspicuous investment of American power and prestige in a country in which the United States has no traditional interests to speak of and which, we expect, very few Americans could find on a map. The intervention comes at a moment of intense debate over the Reagan administration's policies in Central America. It cannot help the president's position in that debate. It is more likely to hurt it.

What is the United States doing in Chad? The basis of the administration's response is the menace it continues to perceive in Libya's Colonel Qadhafi, who has put his oil money at the service of an extravagant ambition and a radical ideology. We do not underestimate Colonel Qadhafi. He has posed, and still poses, real dangers across a wide swath of African and Middle Eastern states. For years he has made trouble for and in Chad. His machinations led him repeatedly to be rejected by his fellow Africans when Libya's turn came to fill the presidency of the Organization of African

Unity. The Soviets have loaded him up with billions of dollars in weapons, confident that he can do a great deal of harm.

To accept that Colonel Oadhafi is a menace. however, is not to agree that the United States should be leading the fight against him. Chad is not familiar, let alone vital, American turf. For the patronage that most of the small African states still seek from the West, Chad looks first to France, the former colonial master, as Secretary of State George Shultz underscored on Sunday. The French do remain in-volved there. The trouble is that the Socialist government under President François Mitterrand has not entirely shed the posture of opposition to "neo-colonialism" that it acquired in its long years in the political wilderness. As a result Paris has been slow to assume what many Africans accept as the traditional French responsibility in Chad. Sunday's statement by the French minister of defense,

Charles Hernu, was a case study in hesitation. Libyan planes are reported to have been bombing targets in Chad, and Libyan troops have reportedly crossed the border. Chad can-not be faulted for seeking foreign help. But will the American response make it more or less likely for an active role to be taken by France and by those of Chad's neighbors with a more direct interest in the outcome?

- THE WASHINGTON POST.

Hatred in Sri Lanka

Sri Lankans are cleaning up the physical debris of last month's violence, but the political debris is not so easily cleared. One frightful week of communal clashes between the majority Sinhalese and minority Tamils left hundreds slaughtered, many most horribly. It was a stunning blow to what looked like one of South Asia's more successful societies.

The mayhem in Sri Lanka was not attributable to the pressures caused by a world economic slump. The free-enterprise policies of President Jayewardene reduced not only inflation but also unemployment. Having no facile economic explanation, the violence also has no obvious economic cure.

Communal rivalry is nothing new in Sri Lanka. Its 11 million Sinhalese came from northern India starting 2,500 years ago. The 1.5 million Tamils came from southern India starting 1,000 years ago. Many Sinhalese re-sent the Tamils for becoming an economic elite in the British colonial era. Many Tamils feel themselves the victims of discrimination since independence. Religious divisions reinforce the ethnic cleavage; most Sinhalese are Buddhist, most Tamils are Hindu. Political

divisions follow these fault lines. This outbreak, sparked by the terrorist killing of 13 Sinhalese soldiers, was the worst in years. It bared potent hatreds that even the adept Mr. Jayewardene cannot calm. Particularly disturbing is the news that troops killed a score of Tamil civilians. There is not much that outsiders can do except appreciate the fragility

of the loveliest looking communities. - THE NEW YORK TIMES.

Other Opinion

Election and Foreign Policy

Richard Nixon was the boss and his foreign policy in his first term was to get himself re-elected president. For that he knew he had to get the Americans out of Vietnam but he would also lose the election if, in getting out, he lost his own original hawkish political constituency. In order to hold onto that he had to distract attention from the substance of his Vietnam policy — the withdrawal of the troops — by the use of garish, noisy and ferocious sideshows: invasion of Laos and lia, lots and lots of bomb

But then the sideshows aroused intense protests, so endangering the vital middle-of-the-road vote. Mr. Nixon needed to appear in the role of a world statesman. Detente with the Soviet Union over SALT-1 and rapprochement with China, in the televised visit to Beijing, reduced the bloody mess in Indochina to a parochial level. Henry Kissinger was the brilliant, docile executant of a foreign policy designed to re-elect Nixon.

The first thing Dr. Kissinger will want to know about Central America is what the president wants to do - and to have said - about it. Then Dr. Kissinger will put the best gloss on whatever it is the president wants: to go in; to whatever, to go in, while looking like staying out; to stay out, while looking like going in; to bomb Managua in order to stay out of El Salvador, or whatever. Democracy in Central America will have nothing much to do with what the president will decide, or how Dr. Kissinger will dress up what the president decides. But democracy in the United States will have everything to do with both these things. The Central America currently under discussion is Central America as an issue in next year's U.S. presidential election.

- Conor Cruise O'Brien, in The Observer (London).

American Instructors in Chad

American military instructors have been sent to the former French colony of Chad for the first time. True, they are a small group and will soon be back home — as soon as the Chadians have been trained in the relatively easy use of the Redeye surface-to-air missiles that Washington has provided. And true, the United States is concerned - much more than France - not so much by the Chadian problem as by the penetrations in Africa of Colonel Qadhafi, America's bête noire. The fact re-mains that the sending of U.S. military instructors to Ndjamena means that Paris cannot or does not wish to commit itself to assuring the security of a former colony. That puts at risk the credibility of the French umbrella over France's African allies.

Chad threatens to become the focus of yet another confrontation between the superpowers. Soviet support for the Goukouni facit has been clearly stated.

- The Guardian (London).

America's decision to supply the deadly Redeye anti-aircraft missile to Chad has raised fears that the weapon could fall into the hands of Libya and perhaps be passed on to terrorist groups. The IRA, the Baader-Meinhof gang, the Libyan government and various Arab groups have all shown strong interest in the Redeye and many have attempted to buy it. Peter Durisch in The Observer (London).

And So It Goes in Show Biz

We sympathize with Christine Craft, the anchorwoman who's suing the Kansas City television station that fired her. It's depressing to be labeled "too old" at 36, insulting to be pegged "too unattractive," gailing to be called "not deferential enough to men." But she surely must realize that style and appearance are far, far more important than journalistic ability in the glamorous world of TV newsreading. She should have gotten the first clue when, as part of her tryout, she was asked to read Edgar Allan Poe's poem, "The Raven," three differ-

ent ways: angry, happy and sincere. TV executives have decided the public wants its news from pretty boys and kewpie dolls, and they pay huge salaries to the ones with just the right looks and voices.

But the fame and fortune can vanish with maturity. Women are discarded first, but men go, too; just ask Floyd Kalber or Roger Mudd. It's dumb, but it's the way it is.

Craft played the show biz game when it suited her, and now she should realize, as aging Rockettes do, that her time is up. She'd do

Arms Agreements Require Flexibility on Both Sides

BONN—American friends have asked me if the growing skepticism about the deployment of new missiles also signifies an increasing gap between Germany and America. I believe the answer is no.

In a recent poll, 90 percent of our popula-tion supported NATO and our alliance with the United States. But at the same time 65 percent opposed the new missiles. Thus these positions are not mutually exclusive.

It would be wrong, and a political mistake, if people in the United States took the European anti-missiles attitude for anti-Americanism, or if the two were confused.

I sincerely ask Americans to appreciate the difference between the threat to them and to us. The United States faces the potential risk of destruction by intercontinental missiles with nuclear warheads, but our small Europe faces the additional risks of a so-called conventional war, of a "tactical" nuclear war and of destruction by medium-range missiles.

I presume that a nuclear war could not be controlled or limited. But who could rule out that an attempt to control it would be made if nuclear war broke out? This would be understandable. However, we in Europe would not live to see the results, for the decision would come only after we had been blasted away.

That is why we in Europe believe that these threatening potentials — the long-range mis-siles that threaten Americans and the medium-range missiles that threaten us --- have to be seen as one single danger. Both must be limited and reduced to an approximate balance. This means linking the START negotia-tions on intercontinental missiles with the negotiations on the medium-range force. This proposition was, of course, included in the reeze resolution adopted by a majority of the U.S. House of Representatives.

I fail to see how negotiations could become easier or less complicated once the stationing of new missiles has begun. All our experience suggests that the opposite will be true. It is easier to avoid the deployment of missiles than to get them removed once they are installed. This is also the right and important key to efforts to stop the nuclear arms race.

Most of us in the Federal Republic acknowledge the support that the United States has given to our security. We remember our joint experience in Berlin - how the threatened city's freedom was defended and how the lesson had to be learned that merely By Willy Brandt

Former Chancellor Brandt is chairman of West Germany's Social Democratic Party.

lot of our people in divided Germany.

My Social Democratic Party has supported the alliance with the West and has helped to shape its policy. Under Social Democratic chancellors and defense ministers from 1969 to 1982, the Bundeswehr increased its contri-

invoking legal rights would not improve the

bution to Western security. The Western democracies will remain partners in security, and we will remain partners in the Atlantic alliance. For the foreseeable future I cannot discern any change in this respect, although as a European I must wish for greater European responsibility for deci-

sions affecting our own fate. This readiness for European co-responsibility should not, however, be confused with a desire for European "neutralism," the specter

interest in the Geneva arms negotiations. We must reckon with the stationing of new Soviet missiles in the German Democratic Republic and other East European countries as a reaction to the implementation of the 1979 NATO decisions that called for the deployment of U.S. missiles in the absence of

a negotiated agreement with the Soviets.

These Soviet missiles will certainly not be capable of reaching North America. But for us they will constitute an additional potential threat. Perhaps new Western measures of re-taliation will then be considered. But the prospect of ever more turns of the spiral in this madness called the arms race becomes less and less tolerable.

It does not increase security. On the con-trary, it creates more and more dangerous

To me it still seems reasonable — now more than ever — for the United States and the Soviet Union to agree on balancing an arsenal of medium-range missiles.

of which has recently again been haunting the world like a kind of German ghost.

Nevertheless, we have seen growing concern in our country not only about the arms race in general and Soviet stubbornness in particular but also about some aspects of U.S. policy. The talk about the possibility of fighting and winning a limited nuclear war in Europe did not start in Germany, and related publicized plans were not developed here. It is no exaggeration to say that the German peace movement has grown strong since officials in Washington began expressing

views the way they still do today.

A war in Europe would not only mean the end of the Federal Republic of Germany but would also finish off the other German state. the German Democratic Republic. And the same would be the fate of our neighbors to the east and west. Although our eastern neighbors belong to the other alliance, and although they have a governmental and social system that we reject, we can only survive together with them. That is why we cannot afford the luxury of unilateralism.

This is the background of our burning

uncertainty. Nobody should be surprised that when the political process proves incapable of solving the problem, increasing numbers of people resort to protest and search for very

different, fundamentally distinct solutions. In respect to the negotiations in Geneva, one cannot overlook the fact that France and Britain also have strategic nuclear weapons. While the British weapons are integrated into NATO, the French ones are under national control. Both would be in a position to strike the other side - at least the central European regions. I believe it is understandable for the Soviet Union to want to negotiate about these weapons as well as those of the United States. For, in case of a conflict, it certainly isn't likely that those weapons of the French and the British would be used against the West.

To me it still seems reasonable - now more than ever — for the United States and the Soviet Union to agree on balancing an arsenal of medium-range missiles: at best at zero on either side, but in any case at a level sufficiently low as to rule out any new chain reaction in the number of Soviet SS-20s. The Soviet Union has indicated its readi-

ness to take this step, and one must take Moscow at its word. Flexibility is certainly required on both sides. There will be no agreement unless the negotiators sincerely want it. I still hope the participants will work intensively for an agreement. If this cannot be accomplished at the level of experts, it might be worthwhile to involve the responsible members of government before deployment begins. Apparently the heads of governments are not ready to try their hand. Let us pray that they do not hesitate until it is too late.

I also want my American friends to realize that NATO's "twin-track" decision of 1979 (calling for negotiations along with preparations for deployment) was made in political circumstances different from today's. At the time, we German Social Democrats intended to facilitate the ratification of SALT-2. Thereafter the problem of European strategic missiles was to be discussed under SALT-3.

NATO's decision, made in Brussels, also was to support détente and arms control. However, since 1980 an impressive number of decisions on weapons programs have been made, not least in the United States. Thus many things have changed in these years.

Besides, there never was nor is anything sacred about the NATO twin-track decision. It was to be a means to achieve an end, namely, the removal of SS-20s down to a level compatible with Western security.

I believe we Germans and Americans agree that we shouldn't let ourselves be ruled by bureaucratic pressures, or put prestige ahead of results. If the real objectives of arms con-trol and disarmament can now be reached by means other than those envisaged two to four years ago, we should make the effort. The community of Western nations would suffer major damage if governments stuck to a formal schedule and thereby lost the broad support of their people for their security policy. For this reason, as well, a serious and honest effort is required in the months ahead. As President Eisenhower said in his farewell eddress in 1961, "the [conference] table, though scarred by many past frustrations, cannot be abandoned for the certain agony of the battlefield. Disarmament, with mutua honor and confidence, is a continuing imperative. Together we must learn how to compose differences not with arms but with intellect and decent purpose."

The Washington Post.

Amateur Foreign **Policy**

By Stanley Karnow

WASHINGTON — It happened in the Nixon and Carter administrations, and it is happening again under Ronald Reagan. The secretary of state is being reduced to a cipher. President Nixon's national security adviser, Henry Kissinger, was cer-tainly better at foreign affairs than Secretary of State William Rogers Cyrus Vance was wise and sensitive, but he was stifled by Jimmy Carter's

chief aide, Zbigniew Brzezinski. In the present case, Secretary of State George Shultz has proved to be a disappointment, and he is being overshadowed by White House insiders who are even more incompetent.
Aggravating the situation is the fact that President Reagan has little or no taste for the intricacies of the international arena, but seems to be

easily influenced by his entourage.

Small wonder that there is a spastic quality to the conduct of foreign policy. On a wide range of issues, from arms talks with Moscow and relations with Beijing to the Middle East imbroglio and the Central American crisis, the Reagan administration pre-

sents a picture of incoherence.

The president is supposedly responsible for foreign policy, with his national security adviser acting as a traffic manager, assembling recommendations from the state, defense, commerce and treasury departments, the CIA and other bureaus. In theory, the Senate reserves the right to ratify his decisions.

Practice has not conformed to the theory. Strong presidents, like Richard Nixon and John Kennedy, have tended to run foreign affairs out of the Oval Office. In contrast, Harry Truman relied heavily on Secretary of State Dean Acheson, and Dwight Eisenhower on John Foster Dulles. Wherever they fix the locus of power, presidents have generally

songht to draw on expertise, which the Washington establishment has in abundance. Under Mr. Reagan, inexperienced amateurs have taken over. Consider the life-and-death subject of reaching accommodation with the Soviet Union on the limitation of nuclear weapons. Various factions of different ideological hues have been wrangling over the subject, which is

But the issue has now been shifted out of the State Department, where it was being debated by representatives from assorted groups, and put under Mr. Reagan's national security advis-er, William Clark, whose views tend to be tough. So the pragmatists are unlikely to get a fair hearing.

In the Middle East, where Philip Habib, a veteran diplomat with per-

normal and healthy procedure.

suasive skills, had a crucial assignment, Mr. Habib has been dumped in favor of Robert McFarlane, a Clark deputy unfamiliar with the area. Mr. Habib's dismissal was partly a blow directed against Mr. Shultz, who is being blamed for his failure to draw the Syrians into matching the Israeli pullback from Lebanon during his recent Middle East trip.
Mr. Shultz was also rebuffed when

he tried to appoint President Ford's defense secretary, Donald Rumsfeld, as Mr. Habib's replacement. Mr. Shultz has also been spurned on Central America. His assistant secretary for the region, Tom Enders, was dropped because White House

hard-liners suspected him of being too conciliatory toward the leftists. Mr. Enders was a superhawk when he served as ambassador to Cambodia. The key figures shaping Central

The great thing about this place is you don't get many questions about the Carter papers.

America policy are Mr. Clark and Jess place for the weak and the timid. When he took office a year ago Mr. Chulted Nations, who has long Shultz was hailed as a vast improveheld that military might is the only answer to the problems of the region. Worse yet for Mr. Shultz was Mr. Reagan's decision to place Henry Kissinger at the head of a 12-member commission to propose strategy for Central America. That amounts to a virtual vote of no confidence in Mr. Shultz and the State Department.

It suggests that Mr. Kissinger has earned redemption from Mr. Reagan, who once rejected him as the archi-tect of detente. Thus Mr. Kissinger has entered the wings, perhaps to

supplant Mr. Shultz.

All this is the president's prerogative, but it occurred because Mr. Shultz was unable to assert himself. The corridors of power are a remorse-

so much designed to keep Nicaragua

are beyond comparison.

A 'World Safe for Diversity'

MINNEAPOLIS — No conflict or negotiation is merely two-sided. In one week at the State Department I counted the active sides of every issue that came across my desk; the average number was 5.3. If you don't get all the 'sides" involved in the solution, they become part of the problem.

Force by itself is not power. In international politics, energy, money, trade, culture, data flows and democratic values are all relevant forms of power.

Creep up carefully on the use of force. Violence is easy to escalate, hard to de-escalate. It should never be used just to provide a release for the user's frustration. (A veteran Japanese diplomat once gave me some good advice:

"Never get angry except on purpose.")

Problems and their solutions are multilateral. The U.S. response in Korea looked good and worked tolerably well because it was folded into a United Nations operation. The U.S. response in Vietnam goes down in history as a unilateral failure, even though the United States had more foreign troops associated with it in Vietnam than in Korea.

U.S. standards are not the world's standards. A viable purpose for American foreign policy is "to make the world safe for diversity" — in the words of John F. Kennedy, sometimes forgotten in the actions of his successors. - Harlan Cleveland, a former U.S. assistant secretary of state and ambassador to NATO and now director of the University of Minnesota's
Institute of Public Affairs, writing in The New York Times.

A Modest, Simple Use of Power

WASHINGTON — The trouble with Henry Kissinger is that he's a swashbuckler. That is the trouble with his foreign policy, too. And if that

will be his foreign policy in Central America, we are all in trouble. Thirty years ago foreign policy was an almost anonymous thing. We knew who George C. Marshall and Dean Acheson were, and we knew that they had policies and pursued them. But we also knew, and they knew, that they worked for a president, were part of a government and were supposed, first of all to

leave things undone that ought to be left undone.

What is needed in Central America is not a conjuring of global forces in the service of personal honor. The region is a theater of East-West conflict, but only in a limited sense. The need there, as in United States foreign policy in some other regions of the world, is a modest, even simple use of sense and power, whose aim is to reduce conflict if it does exist, promote American values when such promotion is possible and keep the zones of confrontation as limited, discrete and decentralized as possible.

- Walter Reich, a fellow at the Kennan Institute for Advanced Russian Studies in Washington, writing in the Los Angeles Times.

Geopolitics as a Morality Play

OS ANGELES - Candidate Reagan dismissed the interests of Panamanians, Cubans and Sandinists as nothing more than a manifestation of Soviet subversion of the Western Hemisphere. President Reagan now conducts an aggressive policy in Central America. Now, as then, he responds to a deeply felt ideological view of world politics as a morality play in which the role of Good is played by the Americans and the role of Evil by the Soviets.

while other nations and movements are cast as bit players. Ronald Reagan is a true believer, obsessed with a view of what ails the Konsid Reagan is a true benever, obsessed with a view of what aits the world, dogmatic about how to set it right and supremely proud of his virtue in taking on this historic task. This is the great weakness and strength of his presidency and its significance has been too frequently discounted by much of the Washington press corps, which continues to treat Mr. Reagan as if he were a traditionally pragmatic American politician.

To his credit, Mr. Reagan has been refreshingly honest in exposing the independent that his shaking all this As president has been continued his credit 40.

ideology that lies behind all this. As president, he has continued his nearly 40- year-old incantation of earnestly felt and candidly stated views about the global menace of Soviet communism as the source of all evil.

- Robert Scheer, national correspondent for the Los Angeles Times.

The most significant are ue his efforts to make Korea a de-

> In an interview recently at his home on the outskirts of Seoul, Mr. Kim said he was free to travel and meet people. But he said that he ined under constant surveillance by the Korean Central Intelligence Agency and that if he tried to engage in public political activi-ty he would be thwarted by the government. His chief secretary, Kim Duk Yong, was arrested in June on political charges.

> Mr. Kim asserted that at a minimum the nation's constitution should be revised by a democratic referendum and the president elected by popular vote. "If the present government does not take those two steps," he said, "then it is headed for the same catastrophe that we've seen in the past."

> President Park Chung Hee was assassinated in 1979, seven years after he rewrote the constitution. sharply curbing democratic freedoms to perpetuate his rule.

Mr. Kim said anti-U.S. sentiments among students in particular were becoming more widespread.
"As long as it appears that the
Reagan administration is implicitly supporting the suppression of hu-man rights under Chun," he said. "there will be anti-American feelings in Korea."

The government says tight control on political freedom is a matter of necessity. North Korea, officials say, would use any easing of inter-nal security in the South as an opening for subversion.

"In our country," a government minister said, "the most basic human rights are freedom from poverty and freedom from the threat of war. In our circumstances, some sacrifice of individual freedom is inevitable.

That view is widely shared in South Korea. For all its economic progress, it is still a developing country, with per capita income about one-sixth that in advanced nations, and its growing middle class wants the political stability needed for further development. But at the same time, the rising

Soviet Boycott Plunges Chess World Into Crisis, Leaves Officials Puzzled

MOSCOW --- A Soviet boycott of two crucial matches has plunged the chess world into crisis and left fans and officials alike puzzled over what Moscow hoped to achieve. The Soviet grandmasters, Gary Kasparov and Vasily Smyslov,

both stayed away from their semifinal matches in the current contest to find a challenger for the Soviet

The official reason given in an increasingly vitriolic Soviet campaign was that the president of the International Chess Federation (FIDE, after its initials in French), Florencio Campomanes, had ig-nored the wishes of the players before choosing venues for the games. Both Soviet and Western chess experts in Moscow said the reasoning behind the boycott appeared to be far more complex, but they of-fered differing interpretations of

Soviet motives. Some said they believed the Soviet Chess Federation was out to de-stroy FIDE and establish a new world organization under its own control. Others suspected a subtle plot aimed at ensuring that Mr. Karpov retained the crown for a

AMEX-CBOT Link Ending Barriers Between Securities, Futures Markets

NEW YORK — When the American Stock Exchange and the Chicago Board of Trade last week announced plans to give their members access to each other's stock index futures and options markets, it marked the next to last round in the eventual integration of the securities and futures markets.

The last step in the process will involve merging the Securities and Exchange Commission with the Commodity Futures Trading Commission. A White House panel headed by Vice President George Bush is now studying this possibility as part of its overall examination of regulatory

agencies.
"What the AMEX-Chicago Board joint-access arrangement did was

speed up an irreversible process that began with the opening of the financial futures markets in Chica-The AMEX-Chicago go more than a decade ago," said Thomas A. Russo, partner in the Wall Street law firm of Cadwa-Board link 'will reduce lader, Wickersham & Taft. "That the New York-Chicago was the the first major crack in the thick walls that once separated the rivalry that had led to securities, commodities, and monduplicated products and

Mr. Russo, an authority on lead to larger and more commodity market law who helped draft the first regulations of liquid markets.' the Commodity Futures Trading Commission, noted that the intro-

duction of futures trading in Treasury bills and bonds, other financial instruments, foreign exchange and, most recently, stock index futures and options, has all but eliminated the distinctions between the markets.

"What the AMEX-Chicago Board linkage has done is to raise a sea of questions that cannot be navigated alone by either of the two regulatory agencies or, apparently, by the Internal Revenue Service," he continued.

"As other equities and futures markets link up, these questions and the answers will further erase the existing regulatory lines."

A Unified Tax on Profits?

The IRS, for example, still has not decided how profits and losses on stock index options are to be treated. The top tax on commodity profits works out to 32 percent; that on securities, 50 percent.

A common system of margin requirements also will have to be worked out between the equities and futures markets. Margins on futures are considered to be merely good-faith payments and are often as low as 5 percent of the value of the underlying goods. Equities margins are regarded as cash down payments and are currently at 50 percent of the

As more securities exchanges link up with futures markets, more compatible clearing systems will have to be devised. Currently, there is a single clearing organization that handles this vital bookkeeping for the equities exchanges. In contrast, each commodity exchange has its own clearing unit that transfers the profits and losses of each account at the

close of every business day.

On the positive side, Mr. Russo said, the links "will reduce the New York-Chicago rivalry that had led to duplicated products and lead to larger and more liquid markets. After all, liquidity, or the lack of it, is what makes or breaks markets."

Nathan Most, vice president of the AMEX, noted that, under his exchange's arrangement with the Chicago Board, members there will be able to trade the AMEX's Market Value Index options that are based on the prices of the roughly 850 traded issues, as well as its Major Market Index of 20 stocks that closely correlates with the Dow Jones industrial average of 30 blue-chip stocks.

Lausuit Over Use of Average

Dow Jones Co. has taken legal action to prevent the Chicago Board from using its average as a futures vehicle. While waiting for the lawsuits to be resolved, the Chicago Board is preparing to list other index futures, which would be available to AMEX members.

Kenneth R. Leibler, senior vice president of the AMEX, said the

arrangement was necessary because exchange floor traders and others who are market makers must have the ability to offset their exposure by hedging in other markets.

Without the arrangement with the Chicago Board, AMEX's market

makers would have to lay off positions on other exchanges where they would be treated as outsiders. This would increase their trading costs. It would also mean giving up part of the commissions they charge to execute

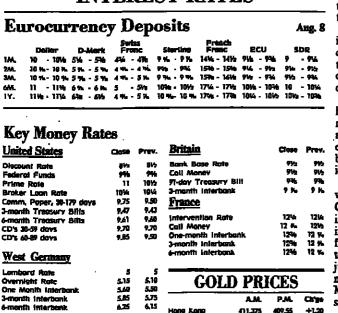

As for the licensing deal with the Chicago Board, Mr. Most said that Chicago's index futures would be cleared by their organization while AMEX options would be cleared by Options Clearing Corp. Both exchanges plan to provide more economical margins for offset operations as well as for spreaders in both markets, if the two regulatory agencies approve, he said.

Slimmer Montedison Attracts Investors

Management Change Creates New Feeling

By Paul Lewis

New York Times Sernce MILAN - Although Montedison, the giant Italian chemicals company, appears to be drowning in red ink, its stock is soaring, and so is morale at

company headquarters here. The reason is that Montedison is seen by industry analysts, and apparently by many of its own employees, as a company not only on the way up but also leading the way among European chemi-

After spending a decade as one of Italy's bloated, Arter spenning a decade 25 one of Italy 5 bloated, loss-producing government-controlled companies, Montedison started a new life in June 1981, when a group of leading businessmen bought a controlling interest. Since then, the company, which had sales of \$6.6 billion last year, has acquired a new management team and ruthlessly trimmed its operations at a cost of more than 10,000 jobs.

It has also moved to consolidate its strengths by

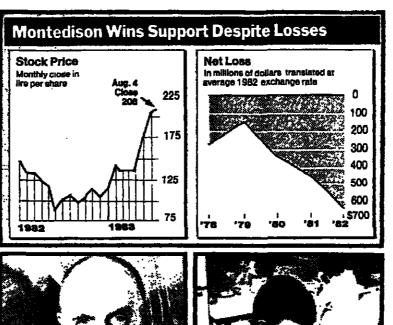

It has also moved to consolidate its strengths by selling unwanted divisions to other European chemical companies and acquiring new subsidiaries that it hopes will be more profitable.

In May, it formed a joint wenture with Hercules Inc. of the United States, the world's largest producer of polypropylene. Montedison executives expect total sales of the venture to reach \$750 million this year and top \$1 billion soon.

The change may not be showing results yet, but investors and managers believe it soon will. In 1981, Montedison lost the equivalent of \$458 million, translated at the average 1982 exchange rate. Last year losses were \$635 million and 1983 will be another deficit year.

Montedison's newly appointed president, Mario Schimberni, predicts the company will break even next year and become profitable thereafter. And as an indication that others believe the company is on the right track, Montedison's stock price has more than doubled during the past 14 months. The stock closed Monday in Milan at 214 (about 13 cents).

Many now see the anticipated turnaround at Montedison as part of an industrial renaissance in northern Italy. Other famous but foundering Italian companies, including the automaker Fial, the tire producer Pirelli, and Zamussi, Europe's largest (Confinted on Page 13, Col. 3)

Mario Schimberni, left, Montedison's president, sees the company breaking even next year and becoming profitable thereafter. Right, a technician works in the company's Farmitalia Carlo Erba laboratories.

U.S. Banks Lift **Prime Rate by** 1/2 Point to 11%

By Caroline Atkinson Washington Post Service

WASHINGTON - Major U.S. banks announced a rise in their prime lending rates Monday, from 101/2 to 11 percent, the highest level for almost six months.

An increase in the prime had been widely expected, as other in-terest rates have climbed markedly in recent weeks. Several analysts said that banks were holding off from the politically unpopular move of boosting the prime until Congress went home for the summer recess.

The prime rate increase could add to fears that rising interest rates will slow down the economic recovery and choke off improvement in the housing market and other interest-rate sensitive sectors of the economy. However, the pace of the recovery has so far been much more rapid than expected,

The strength of the recovery is demand for money. Moreover, the Federal Reserve Board has moved the soaring money supply back un-der control. Paul A. Voicker, the Fed chairman, has told Congress creases in interest rates.

raise the prime while Congress was considering the adminstration's request to increase funds for the International Monetary Fund, which lends money to foreign countries in payments difficulties, several ana-

Most banks backed the legislation, which faced extremely heavy opposition in Congress and was said by several opponents to be tantamount to a bail-out for banks who lent too much money overseas. Monday's increase in the prime -the rate that is charged by banks to their best customers - still does

not compensate banks fully for the increase in their cost of funds that has taken place since May, a bank analyst said Monday. These costs have risen by about 1 percentage point, or 100 basis points, since May, while the prime is now going up by only & percentage point, or 50 basis points, he said.

and recent figures suggest that the economy is still surging ahead this not come down in the next few If money market interest rates do weeks, then a further prime rate rise is likely, several analysts said. one factor pushing interest rates up, as private credit demands have begun to pick up and increase the for not moving the prime down

more swiftly.

A White House spokesman said to tighten credit conditions in re- the rate increase was a temporary cent months in an attempt to bring move that "basically brings the prime into line with the recent rise in market interest rates."

Fed chairman, has told Congress that the recovery is vigorous enough to withstand slight infore the end of the year and "we see Major banks were reluctant to no reason to change our forecast."

Marc Rich Rate Increase Triggers 20.23 Fall in Dow Average

To Give Up **Documents**

U.S. Sought Papers

By Eric N. Berg New York Times Service

NEW YORK - Marc Rich & Co. A.G., one of the world's largest commodity traders, has agreed to grand jury because of intense fears among the firm's customers and suppliers that the government was preparing to seize the company's U.S. operations, according to executives familiar with the case.

Until Friday, Marc Rich had steadfastly refused to produce the documents, contending that as a Swiss firm it did not have to answer

to a U.S. grand jury.

In talking about the agreement Sunday, the executives provided a rare glimpse into the workings of Marc Rich and as well as those of Clarendon Ltd., an offshoot of Marc Rich that is about a month old. Until Sunday, officials of both companies had refused to say anything about their operations or the government's investigation into

Marc Rich's tax practices. In a three-hour interview, executives of Clarendon said Marc Rich agreed to comply with the federal prosecutors' requests for documents because the firm's operations had been badly hurt by adverse publicity arising out of the tax investigation.

The Clarendon executives requested the interview in an attempt to ease concerns of their own customers and suppliers, who they say have mistakenly associated Marc Rich's problems with Clarendon. Officials of Marc Rich have declined to be interviewed.

While Marc Rich did not lose business because of the publicity, the executives said, the events had caused buyers and suppliers of metals traded by the company to "back away" from Marc Rich and "proceed with caution." As a resuit, they said, Marc Rich decided to end its yearlong struggle to resist the request for documents.

"They have now concluded that it is in their interest, from a financial and reputation point of view, to comply," said Peter F. Ryan, the chief financial officer of Claren-

Willy R. Strotbotte, formerly the head of Marc Rich's metals and minerals unit and now president and chief operating officer of Clarendon, said, "They have decided to be pragmatic rather than dogmat-

Mr. Strothotte and Mr. Ryan were interviewed in the presence of Clarendon's attorney, Peter Fleming Jr. The Clarendon executives insisted that their firm was separate from Marc Rich and that their customers' fears, therefore, were unjustified. But the government maintains that Clarendon and Marc Rich are really one and the

The grand jury has been investigating whether Marc Rich, in a complex pricing scheme, inflated the price of the oil that its U.S. subsidiary paid to the Swiss parent, thus evading about \$20 million in (Continued on Page 13, Col. 3)

Telex 297401

August 9, 1983

The Warrants have not been registered under the United States Securities Act of 1933 and may not be offered or sold, directly or indirectly, in the United States of America (including its territories, its possessions and all areas subject to its jurisdiction) or to nationals or residents thereof, nor have the Warrants been registered under the Securities and Exchange Law of Japan. This announcement does not constitute an offer to sell or a solicitation of an offer to buy the above securities. The Warrants may not be offered or sold in the United Kingdom to persons other than those whose ordinary business it is to buy or sell securities, whether as principal or agent, nor may the Warrants be offered or sold in or to any resident of any other jurisdiction where such offer or sale would be unauthorized or unlawful.

If you purchased this Trib at a newsstand, you're already enjoying a rare bargain—the whole world in just a few tightly written, fact-packed pages. You're reading a product created by scores of journalists working day and night from dozens of distant datelines to bring you a compact compilation which can be purchased for the price of a cup of coffee.

But why not double the bargain? Enjoy twice as many newspapers with double the headlines, business trends, candid commentary, high fashion and comic strip hi-jinks, including the world famous cat Garfield.

By subscribing to the International Herald Tribune for six conths or a year, you save almost half the newsstand price on

each copy. Up to 42% off, to be precise. Twice as many Tribs for your money.

Join the global who's who of thought-leader readers who turn to each morning's Trib for the latest in objectively reported world news, briskly written opinion, the day's closing business tabulations. buy-and-sell reports from the international market-place, at-the-stadium recaps of just-completed matches, what's happening in the world of culture—and all in an international perspective.

an international perspective.

Double the value of the Trib by halving its price. Subscribe now so you don't miss a single issue. Major credit cards accepted. Just fill out the coupon below and mail. For maximum savings, subscribe for a full year. This cut-price subscription offer is for new subscribers only.

BUSINESS BRIEFS

NutraSweet to Royal Crown Cola

SKOKIE, Illinois (UPI) — G.D. Searle & Co. said Monday it agreed to supply its low-calorie sweetener, NutraSweet, to Royal Crown Cola Co. Terms of the agreement were not announced

A contract to supply NutraSweet to Coca-Cola Co. was announced last week. NutraSweet, which was approved July 8 by the Food and Drug Adminstration for use in carbonated beverages, is made of amino acids that occur naturally in many foods. It is known generically as aspartame. Soft drinks containing NutraSweet currently are marketed in Canada, Ireland, Denmark, Sweden and Norway.

Tories Consider Selling British Gas

LONDON (AP) - The Conservative government is considering plans to sell off British Gas Corp., one of its most profitable state-owned industries, the Energy Department said, adding that the sale could take

London's Observer newspaper said the sell-off could raise more than London's Observer newspaper said the sen-on could raise more than £3 billion (about \$4.5 billion), making it the second-biggest denationalization measure after the proposed £5-billion sale of British Telecom, which controls most of Britain's telephone and communications service.

The Observer said the government was considering selling the corpora-tion's entire production and supply network — including its North Sea oil holdings — and selling 51 percent of the company's stock on the London Stock Exchange. British Gas earned £188 million for the year ended March 31, up 31 percent from a year earlier.

CSX Corp. Wins Control of Texas Gas

RICHMOND, Virginia (AP) — CSX Corp., a major U.S. railroad holding company, has gained control of Texas Gas Resources Corp., a Kentucky-based gas, oil and transportation company.

A ruling in Washington on Saturday by U.S. Supreme Court Justice Lewis Powell cleared the last legal hurdle for the \$1.07-billion takeover, and CSX quickly bought 14.9 million, or more than 72 percent, of Texas Gas and CSX quickly bought 14.9 million, or more than 72 percent, of Texas can bearing more ach bearing more ach bearing more can be considered to the construction of the cons

Gas's 20.6 million shares outstanding at \$52 a share.

The boards of the companies agreed June 7 to the takeover, which CSX

ought to integrate its transportation system. Texas Gas turned to CSX as a merger partner two days after Coastal Corp., a major oil and gas producer, announced a bid to buy Texas Gas. Coastal dropped its bid

Merck to Buy Control of Japan Firm

TOKYO (AP) - Merck & Co., a major U.S. pharmaceutical concern, is to acquire for about \$10 million a controlling interest in Torii Yakuhin K.K., a Japanese company that makes antibiotics, a Torii official said

The official said Merck agreed to buy a 50.5 percent interest in the Japanese company. Merck, based in Rahway, New Jersey, agreed last week to acquire about 51 percent of Banyu Pharmaceutical Co.

DUBLIN — Shares in Atlantic Resources, an Irish company engaged in offshore oil exploration, soared on the Dublin stock market Monday following reports that an exploratory well drilled by its American partner

- Shares in Atlantic Resources, which has as partners Gulf Oil Corp. and Union Oil Co. of California, jumped to 5.85 Irish pounds (\$6.88) in midsession trading, a rise of 1.65 pounds from Friday's close. A month ago Atlantic Resources shares were trading at 40 pence each.

Gulf has declined all comment on reports of an encouraging second test at its well some 20 miles (32 kilometers) off the southeast Irish coast, beyond confirming that it was testing the well. The first test last week produced oil flowing at about 2,800 barrels a day, according to uncon-

U.K. Producer Prices Rise 0.2 Percent

LONDON (Reuters) — British producer prices rose a provisional 0.2 percent in July from the previous month after a 0.2 percent rise in June, while manufacturers' costs dropped 0.6 percent in July after a 0.2 percent rise in June, the Trade and Industry Department said.

Caracas, Moscow Renew Oil Accord

CARACAS - Venezuela will renew a lapsed oil agreement with the Soviet Union this month, sending 20,000 barrels a day of Ceuta crude oil to Cuba, oil industry sources said. The agreement is to last until

December, but may be extended. export blend oil to refineries at Gelsenkirchen jointly owned by Petroleos de Venezuela and Veba Oel, the West German state-controlled oil company. The sources said the agreement would allow Venezuela and the

Soviet Union to save on shipping charges.

The oil swap involving Cuba and the Soviet Union first went into effect in 1978. It was allowed to lapse in 1982 when the differential between Venezuela's prices and Soviet prices made the transaction uneconomical for Venezuela's European customers, the sources said.

Saudi Basic to Build 2 Chemical Plants

LONDON (UPI) - State-run Saudi Basic Industries Corp. agreed to build two chemical factories with help from B.F. Goodrich Co. of the The plants are to be built in Al Jubail industrial district in eastern

Saudi Basic was licensed by Goodrich to manufacture 300,000 tons of vinyl chloride monomer and 200,000 tons of polyvinyl chloride a year, the Saudi company said.

Company Notes

James River Corp. said it signed a letter of intent to acquire H.P. Smith Paper Co. from Phillips Petroleum Co. for \$34.5 million. The acquisition is to be funded from current cash resources, James River said. H.P. Smith, based in Chicago makes polyethelene and silicone coating release papers used with pressure-sensitive adhesives. It had sales of \$51 million in 1982. tern Bell Telephone Co. reduced its request for an annual rate Southwestern Bell Telephone Co. reduced its request for an annual rate increase to \$497.2 million, but the company said it was not giving up its effort to get a \$1.7-billion increase. The revised rate plan filed with the Texas Public Utility Commission would boost the average monthly residential phone bill in Texas by \$6.45, compared with the \$30-a-month increase under the \$1.7-billion rate rise that Bell proposed June 24.

*Budget Deficit in Emirates To Be Record; Taxes Urged

ABU DHABI - A sharp drop in , oil revenue has led the United Arab Emirates to predict its largest budget deficit ever and prompted calls

for the introduction of taxes. The minister of state for cabinet affairs, Said al-Ghaith, said Monday that the cabinet had approved a 1983 draft budget with an expect-ed deficit of 5.51 billion dirhams (\$1.5 billion), the largest shortfall in the federation's 12-year history.

which make up more than 90 perwhich make up more than 90 perbillion dirhams in 1982 from 45.5

to 1000 billion in 1981.

In the 1000

revenues are projected to fall to 12.9 billion dirhams. The sharp drop in revenues has led to calls for taxes in the emirates, whose people, according to a recent World Bank report, are the richest in the world;

Swiss Prices Rise 2.2 Percent

Reviers BERNE - Swiss consumer hirices rose 2.2 percent in July from year earlier, the Federal Office for Industry, Trade and Labor said.

The increase was the lowest since

February 1979.

the federation also has substantial reserves abroad.

The minister of state for finance and industry, Ahmed al-Tayer, was quoted as telling the al-Khaleej newspaper: "The imposing of taxes of various kinds should be one of the choices that must be considered — if not now, in the very near

Canadian Gold Find G.D. Searle & Co. Agrees to Supply Proving to Be Vast

By Douglas Martin New York Times Service

HEMLO, Ontario - This deliniuve reference works as the Columbia Lippincott World Gazthe map by gold.

Drivers approaching Hemlo—a motel, restaurant and gas station that flank the Trans-Canada Highway 450 miles (720 kilometers) northwest of Toronto - are met by rows of orange claim markers fluttering in the breeze. In the adjacent bush, crews of men and machines can be seen scraping and blasting their way through the muskeg and underlying rock to tap into a gold discovery that many analysts rank among the world's biggest.

"This rush is as big, if not bigger, than Kidd Creek in 1964," said Michael Pickering, a mining analyst with Midland Doherty Ltd. in Toronto, referring to Texas Gulf Sulfur's huge discovery at Kidd

So far, exploration and mining have uncovered more than 13 million tons of proven ore reserves, each bearing more than a quarter of an ounce of pure gold, or an indi-cated 3.25 million ounces.

Mining companies involved esti-mate that Hemlo may ultimately yield more than 50 million tons of high-grade gold reserves, and analysis expect that even that projec-tion will be surpassed.

If the estimates hold, and if the yield-per-ton remains at about a quarter ounce, the value of Hemlo's output could surpass \$6 billion at current gold prices.

The early finds are so encouraging that analysts have begun comparing Hemio to previous finds that have made Canada the world's bump-in-the-road village, so timy third leading gold producer, behind that it warrants no mention in such South Africa and the Soviet Union. South Africa and the Soviet Union.

"Hemlo could become a new Timmins," said Alexander C. Douetteer or the Rand McNally Comlis, an analyst with Gordon Securimercial Atlas, is about to be put on
ties Ltd., referring to the Ontario city where 250 million tons of highgrade ore have been produced in the past 60 years.

> To many analysis, the arrival last fall of the giant Canadian mining company Noranda Mines Ltd. underscored the seriousness of the find. In setting up shop at Hemlo and announcing plans to build a \$100-million smelter, Noranda joined dozens of big and small mining concerns and the hundreds of speculators and prospectors. The enthusiasm for Hemlo is

> fired to a large extent by its unusua geology and ease of access. While most gold is found in quartz, Hemlo's is embedded in an unusual type of sedimentary rock. For this reason, Hemio's potential was dismissed for years, even though gold has been known to exist there since

The fact that gold has been dis-covered at Hemlo on a major scale, geologists say, could mean it might be found in many places that had seemed unpromis

"We just don't know where it's going to lead," said Garth Pierce, head of Noranda's Hemlo opera-

Geography, too, has been a boost to Hemio's gold rush. The town is on the Trans-Canada High-way and near a railroad, and water and electricity are readily available. Douglas Nicholson, an analyst Blasting being carried out at Noranda Mines' gold-mining stake at Hemlo, Ontario. His International Corona Re- Lac Minerals. Long Lac's estimate with Alfred Bunting & Co., termed

da's last major gold discovery, in the mid-1970s: Detour Lake, about 125 miles north of Timmins. To develop Detour, a partnership comprising Amoco, Campbell Red Lake Mines and Dome Mines had to build roads and a town. At Hemlo, company officials es-

timate, operations would be profit-able even if gold fell to half its current price of about \$425 an ounce, or if ore concentrations were half as rich.

Thus, the cost of recovery prom-

Hemlo is the financial child of Murray Pezim, a Vancouver promoter and businessman who, among other eccentricities, keeps a whistle on his desk to blow in the ears of unwanted phone callers. In a recent interview, Mr. Pezim claimed to own a controlling interest in about 70 companies, including about 50 in the Hemlo area.

discovery in 1981, and later that year accepted Teck Corp. as a 55percent partner. Corona drilled 75 unsuccessful holes at a cost of \$1.5 Hemlo mining concerns. Noran-da's entry in November was further million before striking it rich. "It's brilliant, and I deserve a lot

Two other Pezim companies. Goliath Gold Mines Ltd. and Golden Sceptre Resources Ltd., hold claims on another large Hemlo tract. Noranda bought into this one in November, on a 50-50 basis, for \$6 million. Noranda is building a mineshaft, which will produce the first gold from Hemlo as early as next year. It also plans to build a mill costing as much as \$100 million.

The other principal gold deposit eries in the past have often not staked so far was found by Long significantly depressed prices.

Kuwait Clears New Rules for Stock Trading

Reuters
KUWAIT — The Kuwaiti cabinet has approved new rules for the country's official stock market. The rules are to be put before an extraordinary meeting of the national assembly for ratification, the Kuwait News Agency said.

It quoted a government spokesman as saying the proposed law, which is intended to prevent fraudulent stock transactions, would give the market a legal identity and establish an 11-member board to oversee its activities.

Jassem al-Marzouk, the merce and industry minister, told a press briefing on Sunday that he would head the board, which is to include other government officials, representatives of the Chamber of Commerce and experts from various economic areas.

The board would be empowered to set rules for stock transactions and new-share listings, and, in some circumstances, to suspend trading or block certain stock sales. the agency said. It did not elabo-

THE unhappiest man, Kierkegaard once I wrote, is someone who lives in past memory or future hope, someone incapable of savoring the present and obsessed, instead, with inventing ways to make the time pass by. Such a person is Frances, the narrator of Anita Brookner's fine, deftly written new novel, "Look at Me."

Frances is the sort of person who is forever doing favors, never asking them. She is the dutiful daughter, the reliable friend, the extra guest at the dinner table, who can always be counted on to help clean up the mess after the party is over. Reminiscent of Barbara Pym's heroines, she is someone who has been raised to be polite and earnest, and yet feels that the Old World virtues of her parents have ill equipped her to deal with the brave new world around her.

When she is befriended by a wonderfully charming couple named Nick and Alix Fraser, Frances suddenly envisions a bright new future. The Frasers not only introduce her to a suitably sensitive divorced man named James, but they also show her a different way of living. They are free and easy where she is painfully proper, sophisticated where she is innocent, assured where she is doubtful, and Frances decides to try to become their apprentice in life -a decision that, for her, will have devastating

consequences.

A fastidious craftsman who always keeps the moral vision of this novel in sharp focus, Brookner writes in spare, felicitous prose, using the device of a first-person narrator to balance irony and compassion. Though she distances herself from Frances, she makes the reader feel Frances's pain, her loneliness, her rush of happiness on meeting James and her crashing disappointment when both the affair and her friendship with the Frasers precipi-

tously end.

Nick and Alix gradually emerge as bored, careless people, the sort of people who smash things up and then casually move on, but if they are guilty of using their friends for enter-tainment and distraction, Frances, too, is re-

vealed as possessing certain predatory impulses. Feeling spurned and inept at making connections, her hopes once again attenuated she resolves to use the people around her as material for a novel. She decides to become a

Alice Brody, the spirited heroine of Cathleene. Schine's first novel, "Alice in Bed," shares. with Frances, a gift for monitoring her emotions and articulating her perceptions with poise. Apart from that, the two could hardly be more different.

A bright, plucky teen-ager who has been raised in Westport, Connecticut, and educated at Sarah Lawrence, Alice suddenly finds herself in the hospital, her legs mysteriously paralyzed. Confined to bed, she entertains herself by ruminating about her past and present. She observes that her cadaverous doctor bears a striking resemblance to Dante's death mask argues that "the early Dylan was, in its way, more sophisticated than the late Dylan," and chides her unconscious for producing conventional Freudian dreams.

During her year's sojourn in bed, very little happens. The pain in Alice's hips worsens and then subsides; visitors come and go. We meet her absent-minded mother, who brings her pillowcases embroidered with pink scallops and snacks from the Russian Tea Room; her father, who files for divorce, declaring on the witness stand that their house is very messy: her former boyfriend Jeff, over whom she used to brood, and a handsome young surfer with a Masaccio face, who treats rehabilitation as though it were some kind of exciting new sport.

Alice writes letters and talks on the phone, she watches soap operas on television, moons about her two lovers - the frenetic Simchas Fresser and the simpering Dr. Davis — and the undergoes assorted tests and operations. Out of these bare bones of a plot, Schine has fashioned a fluently written story and found an engaging voice. Even though there is little development of the supporting cast and almost no narrative suspense — we never really doubt that the resilient heroine will recover, indeed thrive --- we come to care about Alice and we go on reading briskly because we want to know

European record.

is still evident.

An expected showdown in the Gohr, who held the world record

Koch, finished second in 11.02 and Diane Williams of the United

States was third in 11.06. In Monday's other final, lightly

regarded Zozislaw Hoffman of Poland won the triple jump with a personal-best 57 feet, 2 inches (17.414 meters).
Willie Banks of the United

States and Ajayi Aghebaku of Ni-geria each cleared 56-4%, but the American was awarded the silver medal on the basis of a better sec-

Lewis, gunning for three gold medals here - he is the overwhelming favorite in the long jump and the anchor on the favored U.S. 400-meter relay team - was relatively slow coming out of the blocks in the 190. He trailed the diminutive Smith

before earthing him after about 60 meters. Then the large and powerful Lewis, considered the greatest sprinter-long jumper in the world since the late Jesse Owens, who dominated during the 1930s, accelerated and charged to the fore. There was no catching him.

He blasted past the finish line an easy winner and kept running for another 100 meters, his right hand raised in triumph.

Smith captured the silver medal and King edged 1980 champion Al-lan Wells of Scotland for the bronze medal. Wells finished

fourth in 10.27. The women's 100 appeared to be a battle between Göhr, the short,

stocky East German, and Ashford, the sleek American. But when Ashford pulled a hamstring, Göhr, with her short, chop-py strides, was able to withstand

the late charge of Koch. Ashford, who started in lane two, veered into the third lane when she felt her leg tightening. She skipped-stepped a few strides, threw her hands into the air, fell to the track and rolled back into lane two, grabbing the back of her leg.

Dr. Anthony Daly, the physician for the U.S. team, estimated Ashford would be sidelined for eight to 10 weeks. "It's an old injury," said Daly.
"She felt it again Sunday in the

While the crowd, announced as 25,000, was mesmerized by the 100meter races, it thoroughly enjoyed the triple jump, thanks mainly to

the popularity of Banks. The smiling, loose American led until the 24-year-old Hoffman surprisingly cleared 56-114 on his

Hoffman, the last jumper in the final, had the victory clinched when he uncorked his best leap on his final try. The distance was a Polish record and tied him for eighth place on the all-time list.

The fans certainly accorded Holfman the applause earned by a Her countrywoman, Marita winner, but they reserved their biggest cheers for Banks. Prior to each of his jumps, they began clapping rhythmically while the American was trying to psyche himself up by listening to music on his stereo headphones. And each time after he jumped, they cheered his efforts. Among those missing from the

triple jump final was Keith Connor of Britain, ranked No. 1 in the world last year and the favorite in this meet. But Connor, plagned by a bruised heel, failed to get through Sunday's qualifying.

Meanwhile, Edwin Moses of the

United States, unbeaten since 1977, led the advance into Tuesday's final of the men's 400-meter Moses, the world record holder

and 1976 Olympic champion, was clocked in 48.11 seconds in romping to victory in his heat. West German Harald Schmid, the last man to beat Moses, won the other semifinal in 48.57. Americans finished second in

both heats. Andre Phillins was behind Moses in 48.99 and David Lee followed Schmid in 48.63. West German Hans-Peter

Ferner, who upset Britain's Sebas-tian Coe in last year's European championships, had the fastest time of the three semifinal heats of the men's 800 leading up to Tuesday's final.

The bearded Ferner was clocked in 1:45.24 in staving off the late challenge of David Patrick of the United States.

Willie Wülbeck, also of West Germany, won his heat in 1:46.21 and Brazilian Joaquim Cruz took the other in 1:45.62.

Notable by their absences were Coe and Cuban Alberto Juantorena, the 1976 gold medalist. Coe is home with a glandular ailment, while Juantorena was injured in Sunday's heats, suffering torn ligaments and a fractured bone in his right foot, which required surgery. Svetlana Ulmasova of the Soviet

Union, the world record holder in the women's 3,000 meters who was not supposed to run because of a severe cold that recently kept her hospitalized for 18 days, was a surprise starter and won her semifinal

Tatyana Kazankina, also of the Soviet Union, and Mary Decker, the U.S. record holder, each clocked 8:44.72 in the other heat. More than 1,500 athletes, representing more than 120 countries, are assembled for the seven-day event at the site of the 1952 Olympics. It is the greatest gathering of track stars since the 1972 Munich Olympics. In 1976, several African nations boycotted the Montreal Olympics and the United States pulled out of the 1980 Moscow Olympics.

PGA champion Hal Sutton on the 18th green: 'Tve got a high percentage from four inches.

Sutton Wins PGA by 1 Stroke

Nicklaus Makes an Impressive Bid With Final-Round 66

about four months.... Now that

By Thomas Boswell

Washington Past Service PACIFIC PALISADES, California — Jack Nicklans must be getting sick of standing near the 72d green and offering his sincere and heartfelt congratulations to a wholesome, piercing-eyed young man who has just respectfully but firmly taken a major golf champiouship away from him.

Last summer, it was Tom Wat-son at Pebble Beach who snatched the U.S. Open away from Nicklaus. Sunday, it was Hal Sutton — a young man whose game (ace can evince almost the same forbidding intensity as Nicklaus's — who by a single stroke swiped the 65th PGA mpionship from the greatest

On a sweltering afternoon at storied Riviera Country Club, the Hollywood-set course called "Ho- don't even think I know what it gan's Alley," Nicklans had one of means. You read it enough, though, his greatest finishes, a soorching 66 and you can begin to believe it. I and a four-round total of nine-under-par 275, two shots better than sometimes. . . I'd gladly reach in in 1948.

But Sutton, who began the day six shots ahead of Nicklans, steadied himself after a bogey-bogey-bogey near-collapse on the back a major championship by closing with four straight pars after he

margin to one shot. Sutton, the PGA tour's leading to hold an excellent round together darily difficult 447-yard 18th — an uphill par-4 terror on which Nicklaus took his only double bogey in the first round. Sutton smoked his drive to the center of the fairway,

feet and calmly two-putted. Peter Jacobsen shot this PGA's low round, a 64, for a 276 total and third place. But he bogeyed the 18th while Sutton was still back on No. 15 and never was a realistic threat to win. Pat McGowan (a closing 69) was fourth at 277, a shot ahead of John Fought. Ben Crenshaw, who began the day two shots behind Sutton in second place, disgraced himself with a wild-driving

laced a six-iron shot to within 18

Jungle Ben round of 77 that plummeted him to ninth place. In the end, it was a day dominated by two men: the charging and inspired Nicklaus who had the landscape awash in war whoops, and the square-jawed, clenched-teeth Sutton who was trying desperately to hold on for the sake of

his long-term golling sanity.

Yes, this probably was a turning point in my career," said Sutago to squander a six-shot lead at a tournament in Virginia. "Williams-burg stayed there in my thoughts all day. It became real prevalent in my mind after the third bogey [at No. 14]. I said, 'I'm not going to let this happen again.' I felt that my to conservative. I think maybe I let up" — when he had a five-shot lead

after 11 holes.
"The crowd wasn't the only one who knew the Bear was comin," quipped Sutton. "I told myself, Well, I don't need to do this two weeks in a row on national TV.... Hey, let's go - let's not embarrass ourselves like that."
"I certainly felt the challenge. I

said, 'This is what it's all about, to accept the challenge and come through." Come through he did, and with

such clan that Nicklaus says he greeted Sutton with these words behind the 18th green: "Hai, that will be the first of many for you." Years from now, if Sutton has his

way, we may look back on Sunday

as the occasion when the new bear supplanted the old. From his hair to his glare, from his bulging forearms to his powerful legs, Sutton looks more like a younger Nicklaus than any other player on tour. But, from Trevino to Miller to Weiskopf to Watson to Sutton there have been potential heirs to Nicklaus and none has ever approached his decade-upon-decade consistency.

Even in defeat Sunday, Nicklaus, 43, reasserted his unique position in the game. He has not only won 19 majors, but now has been runner-up in 16 - another all-time

"It's kind of fun to come down to

Nicklaus, who made no bogeys and Hunched under a tree, he couldn't even chip the ball sideways back to birdied the second, fifth, 10th, 14th and 16th holes. During a midsea- the fairway. son slump, "I was miserable for

I'm playing well, I guess it's over [the 1983 majors]. That's the way it works, isn't it?" Both Sutton and Nicklaus came he lost with his miserable play on here with something important to prove. Sutton wanted the world to

know he wasn't a choker and Nicklaus wanted to show that his dismal performances in this year's majors - a 300 at the U.S. Open, for instance — were not the beginning of the end of his great career. "I'm relieved that I relinquished that choking thing that they put on me," said Sutton, who, had he parred in from the 12th tee would

have tied the all-time PGA score record of 271. "I hate that word, I don't even think I know what it Ben Hogan's U.S. Open score here my pocket and give you back this in 1948.

my pocket and give you back this check [for \$100,000] just to say I'd

Nicklaus had been teasing Los Angeles Times columnist Jim Murbogey near-collapse on the back ray all week about the humorist's unfortunate timing in picking this week to write an eloquent obituary to Nicklaus' career. "My compoknew Nicklans had reduced his sure my ability to make putts when I really need them, and my ability

money winner with \$397,684, man-aged a shaky even-par 71 to go with his earlier scores of 65-66-72 for a Riviera scores of 65-66-72 for a Riviera record mark of 10-under- this more than I ever did. It's just a par 274. That total is the lowest beck of a lot of fun. This time, after under-par figure in the tourna- I shot 73 in the first round and Hal ment's history. His coup de grace shot 65, I just gave myself more was a rock-solid par at the legen-work than I could get done."

Sutton had no doubt about how he won. And Nicklaus was equally clear about the reason he lost.

"The second hole" — a 460-yard par-4 — "was good to my all week," said Sutton. "I only hit that green once all week, and I played it one under par." On Saturday, Sutton made what he called the greatest up and down for a par that he'd ever made. Sunday, he may have topped it. At No. 2, he drove so wildly left that he almost went out of bounds into the driving range.

Het Surten, \$100,000 Jack, Nicklous, 40,000 Part McGowen, 30,000 Jon Fooshie, 2,000 Part McGowen, 30,000 Jon Fooshie, 10,000 Jon Fooshie, 10,

Then, from 205 yards away in the rough, Sutton bit the ball to four-foot tap-in range for what he called "a receasi critical par."

Nicklaus was equally certain that the par-5s - the-piece-of-cake first, and the 11th and 17th. Trying for eagle Sunday at No. 1, Nicklaus found grass jail with his second shot and settled for par. At both the 11th and 17th, he had simple punch shots - one of 40 yards, the other of 80 - that dozens of people in the gallery could have nudged within 15 feet of the hole at worst. Nicklaus hit duffer shots on both. leaving the putts 30 and 40 feet short of the hole. Both times, he settled for pars and did slow burns.

This PGA's final hour was one of exceptional drama. After Sutton's third straight bogey at the 14th, and Nicklaus's 18-foot birdie at the 16th ("read it wrong, hit it wrong, went in the hole"), every score-board showed Sutton's lead down

"My only concern was if Jack birdied the 17th that would put me behind the 8-ball," said Sutton. "I'd have to make another birdie to win, and the 16th and 18th certainly aren't birdie holes."

When Nicklaus hashed his chance at No. 17, Sutton's collar loosened. He almost let a short putt slip outside the hole at the 17th, but his second putt at the 18th was ten-

Said Sutton, "I've got a high percentage from four inches.

Pittsburgh has been outscored. 25-5, in its last four games after winning 22 of its first 29 following the All-Star break. Phillies 5, Cardinals 2

In St. Louis, a squeeze bunt by Ivan DeJesus scored Joe Lefebvre in the seventh, enabling Philadelphia to break a 2-2 tie and go on to send the Cardinals to their seventh straight loss, 5-2. Mike Schmidt ners. Marty Bystrom (4-7) broke a personal three-game losing streak by scattering four hits over six innings. Ron Reed pitched the final three innings for his fifth save.

Mets 6, Cahs 4 In Chicago, Hubie Brooks's one-

In San Francisco, Ray Knight's sacrifice fly scored Phil Garner in

the ninth, giving Houston a 2-1 decision over the Giants. Winner Nolan Ryan (11-5) pitched a threehitter and struck out eight, raising his career total to 3,614, two behind all-time leader Steve Carlton. José Cruz homered for the Astros.

Reds 5, Padres 3 In San Diego, pitcher Frank Pas-tore and Ron Oester each hit tworun home runs to spark Cincinnati past the Padres, 5-3. Pastore (5-10) hit the second homer of his career in the fifth to put the Reds ahead, 2-1. He allowed six hits in posting his second complete game in 19

Braves 5, Dodgers 2 In Los Angeles, Brett Butler drove in a run and scored another and Pascual Perez posted his 13th victory of the year as Atlanta downed the Dodgers, 5-2. Perez, who has lost three, departed in the sixth, when the Dodgers scored twice. Steve Bedrosian allowed one hit over 315 innings to record his

White Sox 4, Orioles 3 In the American League, in Bal-timore, Greg Luzinski homered for the third straight game to lead Chi-cago past the Orioles, 4-3. With his fourth straight victory, LaMarr Hoyt (14-10) joined Rick Honeycutt of Texas and Scott McGregor of Baltimore as 14-game winners. Loser Mike Flanagan (6-1) was making his first start since May 17, when he sustained ligament dam-

age to his left knee. Royals 1, Red Sox 0 In Kansas City, Pat Sheridan's home run in the fourth was the margin in the Royals' 1-0 defeat of Boston. Combining on a three-hit-ter were Gaylord Perry and Dan Quisenberry. Perry (5-12) picked up his 312th victory lifetime while Quisenberry notched his 28th save of the year.

Brewers 9, Blue Jays 6
In Milwaukee, Charlie Moore went 3-for-4 with three RBIs and Jim Gantner and Ted Simmons drove in two runs apiece to pace the Brewers to 9-6 triumph and a threegame series sweep of Toronto.

Rangers 4, Indians 3 Indians 7, Rangers 0 In Cleveland, Chris Rando bit a two-run homer and Tom Brennan (2-1) posted his first major-league itout as the Indians broke a fivegame losing streak with a 7-0 vic-tory that gave them a doubleheader split with Texas. In the 4-3 opener, Dave Hostetler doubled home

George Wright with the go-ahead run in the fifth and Victor Cruz picked up his first save of the year, Angels 4, Mariners 3
In Seattle, Bobby Grich drove in two runs and Ken Forsch picked up his 10th victory of the year as California ended a four-game los-ing streak by nipping the Mariners, 4-3.

Camacho Takes WBC Title on TKO thinking was coming apart, not my game. I was going from aggressive

SAN JUAN, Puerto Rico --- Unpeaten Hector Camacho of Puerto Rico won the vacant World Boxing Council super featherweight title here Sunday on a fifth-round technical knockout over Rafael Limon of Mexico. The title was vacated recently when the WBC stripped Bobby Chacon for refusing to fight Camacho.

twice in the round. Camacho dominated from the

In Minneapolis, Bob Kearney hit

Camacho knocked Limon down three times in the scheduled 12rounder. Referee Richard Steele stopped the fight at 2:52 of the fifth round after Limon had hit the deck

start, using hard right jabs and left hooks along with series of straight rights. Limon was slow-moving throughout Camacho raised his record to 22-0, while Limon, who had held the title twice, fell to 47-

CHINA POSTCARD

The Tunnels of Turpan

By Christopher S. Wren New York Times Service

T URPAN, China - The locals do not exaggerate when they claim I that you can fry an egg on the desert sand surrounding this casis in eastern Xinjiang province. Turpan has the dubious reputation as the hottest town in China, and one of the hottest in the world.

In mid-summer, the air temperature lingers at 104 degrees Fahrenheit (40 centigrade) and sometimes climbs to 120. The temperature of the sand can exceed 170 degrees.

Every family has a chamber under its mud-brick house to escape the heat. After the sun goes down, the residents of Turpan sleep on the flat rooftops, where they can catch whatever cool relief the night breeze might bring.

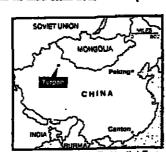

Rain adds up to little more than a half inch annually because it tends to evaporate before it hits the ground. From April to July, Tur-pan gets buffeted by sandstorms, often of blast-furnace intensity, that can bury entire houses and fields. "During a serious sand-storm, you can't see your finger in front of you," says Chen Junkun, a local official.

Yet Turpan has thrived in such inhospitable conditions for the last 2,000 years. Once it accommodated and replenished the camel caravans that plied the silk route through Central Asia; now, with sunny, frost-free weather more than nine months a year, it grows China's finest long-staple cotton, which is exported to Japan and Eastern Europe, and its most succulent melons and grapes. The "fiery oasis," as it has been nicknamed, supports a population of 186,000, mostly ethnic Uighurs.

Turpan is in the world's deepest dry depression, more than 1,500 square miles (3,900 square kilometers) of which lie below sea level. The desert at its lowest point dips 508 feet (154 meters) below sea

The secret of Turpan's survival is an ingenious labyrinth of underground aqueducts that collect water cascading down from the snow-capped peaks and glaciers of the Tien Shan to the northwest. The irrigation system, called the karez by the Uighurs, is believed to have been learned many centuries ago

from the Persians. The karez consists of thousands of wells dug at diminishing depths to catch the mountain water that runs into the ground. The wells are linked by tunnels that relay the water to the Turpan oasis. The water would evaporate if it flowed in normal canals on the desert sur-

face, but it is insulated by the sand Mohammed Akhet, the director of the Five Star commune in Turpan, estimated that the man-made vells nearest the mountains were 300 feet deep. As the desert slopes into the basin of the Turpan depression, the wells become shalower until the water eventually emerges at the oasis as a normal

The first wells of the karez were dug by hand 2,000 years ago. The tunnels, which measure about three feet wide by four feet high, are being reinforced with concrete pipe. Most of those built centuries ago are still in use.

irrigation canal

The karez has been essential to a recent campaign to hold back the desert by planting poplar, elm, date palm and mulberry trees as windpreaks around the cotton fields and vineyards. Yang Dehua, chief of the forestry and agriculture section in Turpan, said 6,000 acres (2,400 hectares) of trees and 3,000 acres of scrub bush had been planted in belts up to about 200 yards wide around Turoan.

Turpan is the most dramatic success in the battle against the desert in the province, formally known as the Xinjiang Uygur Autonomous Region, where less than 2 percent of the land is arable and most of this must be irrigated, according to Li Dingzhi, director of the agriculture and animal husbandry depart-ment in the Xinjiang planning

Edward Seidensticker

Opening Modern Japanese Literature to the West

By Christine Chapman . International Herald Tribune

OKYO - Edward Seiden-I sticker is one of the men who opened 20th-century Japan to Western readers through his translations of contemporary literature. The novels of Yasunari Kawabata - Japan's only Nobel laureate in literatures, thanks in large part to Seidensticker those of the flamboyant Yukio Mishima, the psychological novels of Junichiro Tanizaki, the naturalistic short stories of Kafu Nagai and the philosophical tales of Yasushi Inoue have all been translated by the American professor, now 62. His major opus was the 1976 translation of the 11th-century classic, "The Tale of Genji."

But it is perhaps as a scholar and critic of modern Japan that Seidensticker has created the most impact. "Low City, High City," published last spring by Alfred A. Knopf, is his latest effort to explain the culture he admires. The book is a social history of Tokyo from 1867 to the great earthquake of 1923. The "low" and "high" of the title refer to the low-lying areas of Tokyo - the shitamachi, or central sections and the upper, hill area, the ya-manote, toward which the city was moving. The book is Seiden-sticker's farewell to the low-city common people whose vitality and tastes set the mood of a tireless metropolis. As a history, it reflects its author: learned, witty, full of strong opinions and telling

"The book is an elegy to the death of the low city," Seiden-sticker said. "The Edo culture, with its Kabuki and pleasure quarters, was uncommonly refined and far superior to today's TV-and-baseball mass culture. It's a great story of decline and a

Sitting for an interview in one of the thousands of noisy coffee shops in Shinjuku, Seidensticker looked uncomfortable. Rock music filled the small room while outside the streets were thronged with students on summer holidays enjoying this new pleasure

"I'll recover," he said, "and "newspapers with ease. "I became write about contemporary Tokyo, which would include places I don't like."

Compared to his translations of "The Tale of Genji" and Kawaba-ta's novels, writing "Low City, High City" was "more like simple fun." Seidensticker said. Although he worked on the book for three years, "it was much, much easier," than the "struggles" he endured translating Kawabata or Lady Murasaki, "Genji's" author.

How to put it into English is the constant struggle. The most important thing in literary trans-lation is style. It bothers me hidanion is style. It domes me ma-ecusly when people find infelio-ities, or failures of taste. I don't mind making mistakes, but to have infelicities pointed out is very painful. The most important thing is to put beautiful Japanese into beautiful English."

Calling it a sign of "fogyism" in idensticker shies away himself. S from current favorite writers such as Kobo Abe and Kenzaburo Oe. "I don't like them. I've lost interest in the moderns, although I do like the traditional Yasushi Inoue. He's quite good."

A strong streak of anti-establishment ire runs in the Seidensticker character. He does not admire Japan blindly. At a luncheon speech in May at the Foreign Correspondents Club in Japan, he answered a question about understanding between the United States and Japan bluntly: "I don't think complete understanding is possible. Admiration and interest are enough." The Japanese press reacted immediately; a cartoonist parodied the remark and reporters made a story out of it.

Seidensticker scoffed, and reeated: "Understanding is next to possible, but the bromide that we'll love each other if we under-stand each other is the basis of all international cultural organizations. Understanding someone may make you hate him! The Japanese have misunderstood us rather profoundly these past 100 years. And we get along in spite of

Seidensticker spent a summer in the mid-1950s concentrating being able to read Japanese

really angry," he recalled. "The Japanese newspapers are not objective: They are unfair, anti-American, and leftist. They bend over backward to be pleasant to the North Koreans, the Chinese and the Soviet Union. We are warmongers. The papers are staffed with young men who don't know what they're talking about except that they want peace. Well, who doesn't want peace?

"The Japanese papers were worse in the 1950s than they are now. Things have changed," he conceded. "However, they still fall short of being unbiased jour-

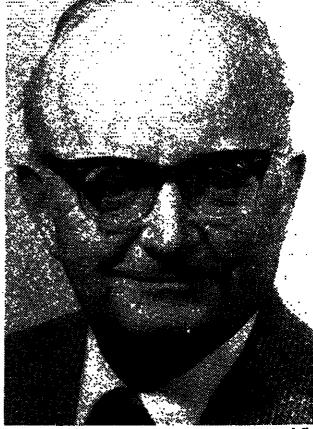

His alliance with Japan began after he graduated from the University of Colorado as an English literature major in 1942 and joined the U.S. Navy. He was sent to the Navy's Japanese-language school at the university.

"I was dodging the front lines," he said. "I looked upon Japanese as something to occupy my time." In 1945 he was sent to Japan with the Marine Corps as a language officer in the intelligence section. After returning to the United States, he went to graduate school at Columbia and Harvard to prepare for a career in the Foreign Service. From 1948 to 1950 he was a diplomat in occupied Japan, then he resigned.

An early recipient of a Ford Foundation fellowship, he studied Japanese literature at the University of Tokyo for two years. He stayed in Japan for 12 more years, doing free-lance writing, translat-ing and teaching at Sophia Uni-versity, a private school. In 1962 he returned to the United States convinced that "a non-Japanese would forever be an outsider here." He accepted a teaching asnents at Stanford University, then in 1966 at the University of Michigan. Since 1977 he has taught advanced graduate seminars as professor of Japanese at

In 1972 he began living in two cities and two cultures. Since he teaches during the fall semester at Columbia he lives in New York from September to February, sharing an apartment with a pro-

Columbia University.

Seidensticker: "Admiration and interest are enough."

fessor who teaches at Columbia in the spring. For the spring and summer he moves to Tokyo and lives in an apartment in Yushima, in the Hongo district, which he insists is low city despite of its

location at the top of a ridge.

Does this double life bother him? "Quite the reverse. I leave each city just about the time I'm beginning to get annoyed. In New York I feel like a cat in the jungle. In Tokyo I don't have the feeling of running for my life or indeed. of running for my life, or indeed the feeling that the police are running for their lives. I'm being sportive," he added, grinning.

New Yorkers have the worst manners in the world. Tokyo is more civil. It's a gentler place with more variety. New York has the best of the West. European culture is concentrated there more than in Paris or London. Tokyo has everything. If I had to choose, I'd take Tokyo, but I hope I never

In "Low City, High City" Seidensticker wrote that the great delights of Meiji-era Tokyo were

"the theater, cherry blossoms. and Sumo wrestling.

Asked to identify the delights of present-day Showa Tokyo, he hedged: "Tokyo's much, much, more varied now than in Meiji Well," he considered, "it couldn't be sumo because baseball has replaced it in popularity. Maybe therater is still very important, but it's more diversified and included classical theater, Kabuki and No, modern theater, yase, which is like vaudeville, and concerts, a new institution.

"For me the greatest pleasure is walking, long, long walks, through the poorer parts of the city. The public baths are fun, and occasionally the bars."

But most of his time in Tokyo he reads and writes. He also collects Meiji woodblock prints and Korean ceramics, gives some lec-tures and attends a conference or two participating in the life of a city that, as he wrote, thrives on the fact that "change itself is a

gold and silver coins, a treasure which sat about 250 years in the wreck of a ship in the North Sea.

PEOPLE

Dutch experts are examining chest packed with nearly 10,000

Underwater Treasure

Is Studied by Dutch

"The chest is fully intact, and the: gold coins are in excellent condetion," said Harold Jacobi, head of the Royal Coin Institute in The Hague. The Sunday Times of 171 London said the treasure was estimated at \$740,000. A team of Dutch and British divers recovered the chest, filled with 2,000 gold ducats and about 7,500 silver coins, from the hulk of a Dutch East Indian trading ship, Vliegent Hert (Flying Harti, wrecked in a storm on Feb. 3, 1735. The divers, in four years' work, previously recovered dozens of bottles of wine, silver swords, and 700 ducats. . . An American treasure hunter says he is certain he has found a ship that sank off Cape Cod in 1717 with what may be \$200 million in gold, silver and jewels. "We've got it." said Barry Clifford of Martha's Vineyard, Massachusetts, "Everything's exactly in the spot it should be; everything we've found indi-cates it's an 18th-century wreck." He said the three-masted English galley Whidah was captured by pirates and sank in a storm. Clifford and his crew, which includes John F. Kennedy Jr., the son of the late president, have been digging underwater test pits for a week to try to identify the wreck. Clifford sail he found iron fittings, handwrought nails, a rudder strap and mizzen step under 10 feet of sand Valerie Talmadge, the state histori-an, said Clifford has not found anything that proves the sunken wreck is the Whidah. "I haven't seen the articles, but none of them sounds distinctive enough to identify the ship," she said.

The best-selling author Kingsley Amis, 61, and his writer wife Jane Howard, 60, were granted a divorce by a London court. Neither contested the divorce, granted on grounds that they have lived apart for two years. The couple, both novelists and television writers, were married in 196 after Howard's second husband. James Douglas-Henry, divorced her on grounds of her relationship with Amis. She has one daughter by her first marriage. Arms's marriage to Howard was his second. He was has two sons and a daughter from his 1948 marriage to Hilary Ann Bard-
